

1. (Project Overview & Origin)

BUBBLES is a meme coin born on the Solana blockchain, inspired by the legendary pet chimpanzee of Michael Jackson — Bubbles.

It tells a story of interstellar civilization, time travel, and cosmic rebellion — a space traveler returning from the “Planet of Apes,” now using NFTs, crypto, and community power to reshape a new world order.

BUBBLES is not just another meme coin. He has an identity, a past, and a mission. Once a star’s companion, then lost in the shadows of history — now he returns to Earth with rage and hope, using the power of blockchain and memes to awaken humanity’s desire for truth, peace, and universal expansion.

2. (Cosmic Mission & Vision)

BUBBLES didn’t return by accident. He witnessed humanity’s rise—and its collapse. He knows: only by breaking the old systems can we build a future of true freedom.

His mission is beyond wealth, beyond meme culture. He is here to reconnect humanity and the Planet of the Apes, to build a thriving interstellar civilization—through on-chain economies, awakened communities, and NFTs that carry the memory of a lost legacy.

We are not bystanders. We are the seed of the revolution.

Project Vision :

- Eliminate poverty
- Coexist in peace
- Explore the stars
- Advance human civilization

3. (NFT System & Lore)

The BUBBLES universe features a complete NFT system — both collectible and functional. Each NFT is a fragment of simian history, connecting reality and the metaverse, the past and the future.

- Character NFTs (Hero Apes): Tribe leaders, tech shamans, space adventurers — each with a unique skillset and backstory.
- Artifact NFTs: MJ’s crystal glove, interstellar mic, time shards — interactive and combinable assets.
- MEME Cards: Socially driven, highly viral NFTs for sharing, flexing, and guild-based battles.

NFTs aren't just avatars. They're your passport to the cosmic economy.
